

BENEFITS OF A MATCHBACK

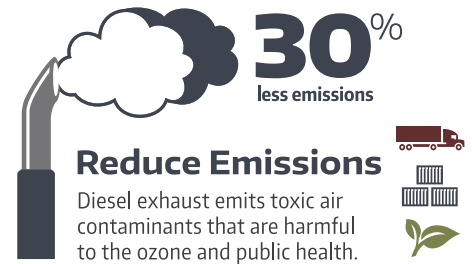

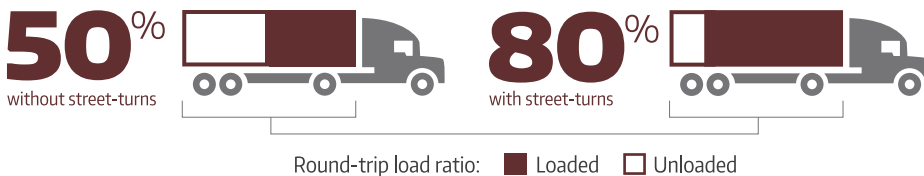

Street-turn (matchback) | verb:
Match import containers and export bookings inland to minimize the km/miles driven; increase container velocity; reduce costs and emissions.

EVERYONE WINS WITH MATCHBACK SYSTEMS™!

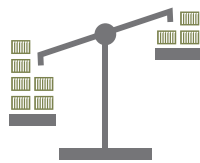

Increase Trucker Loaded Ratio

Less empty trips, more loaded miles.

Increase Driver Productivity

Run more loaded miles with the drivers you already have.

Minimize Repositioning

Work with your customers and vendors to minimize the cost of container repositioning to balance your network.

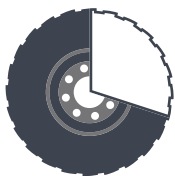

Minimize Detention & Demurrage

Get off the clock and minimize your detention and demurrage exposure.

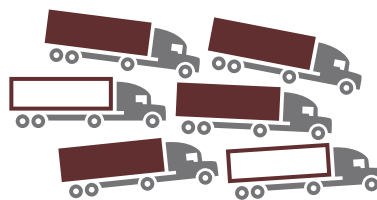

Improve Container Efficiency

Return your assets to the port/ramp quicker.

Reduce Total Costs

Minimize costs associated with ground freight container transportation from port to rail, ramp, or warehouse.

Minimize Port Congestion

Fewer empty moves to the port reduces port delays, wait time, and terminal fees.
